

More qualified patients reaching surgery, and *stronger outcomes after it.*

Guided digital support tailored to each pathway and to your program's requirements, carried from the first seminar through long-term follow-up, so every candidate arrives ready and stays on plan. No app, no login, no new FTEs.

The understanding gap: the six months before surgery, and the years after

None of this is decided in your building. Each one turns on whether a patient met the pre-op requirements, kept up the protein and hydration, and came back for follow-up.

MANAGED AT HOME

How an orbit provides value

- 01 **Lower pre-operative attrition.** The single largest revenue leak in a bariatric program, and almost entirely an engagement problem.
- 02 **Fewer readmissions and ED visits.** Dehydration and nutrition complications are the most common reasons, and the most preventable.
- 03 **Higher supplement adherence.** Deficiencies show up years later as complications and revisions.
- 04 **Better long-term follow-up attendance.** Follow-up is where weight regain is caught, and where most programs lose contact.
- 05 **Fewer inbound calls per candidate.** Every repeat call is staff time spent re-explaining what was already covered.
- 06 **Faster insurance qualification.** A candidate who finishes the requirements sooner reaches surgery sooner.

PLATFORM EVIDENCE, FROM THE CONTROLLED TRIAL

Patients arrived better prepared, called less, and came back less

-41%

readmissions

-53%

calls to the office

+65%

understanding of the plan and what to expect

+22%

patient satisfaction

navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your program's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK YOUR JOURNEY

Most programs start with surgical support, then add the pre-op and outreach versions.

- **Surgical support.** Sleeve, bypass, and revision, from decision through recovery.
- **Pre-op requirements.** The months of visits, testing, and insurance steps before surgery.
- **Post-op nutrition and habits.** Stage-by-stage eating, activity, and supplement guidance.
- **Seminar and outreach.** The information session that turns interest into a consult.

STEP TWO: SHAPE IT WITH ORBIT SOLUTIONS

Eight bariatric journey blueprints, from seminar and outreach through staged post-op progression, slot into the journey you pick. Each is versioned to precisely match your protocols and requirements for your launch. We build it for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about 90 days. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PROGRAM

You can finally see it

- Who opened their orbit and who never did, by patient
- Requirement progress and check-ins routed back before the next visit
- Conversion from seminar to surgery, and follow-up attendance by cohort

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes discussing *your* bariatric pain points and *our* platform.

No demo script, no obligation. We hear which moments are costing your program the most, and give you a brief look at the platform.
