

ENGAGE

Guided journeys for *the weeks between visits.*

Digital journeys approved by your care team that carry your education, reminders, and next steps to patients and families, step by step from diagnosis through recovery. Every action is tracked, and the orbit adjusts to keep each patient on course. No app, no login, no new FTEs.

An orbit surrounds each patient with their journey's guidance and support. It opens in the phone's browser, with no app download required.

What Engage delivers, for each audience

- **For the patient.** Education, reminders, and next steps arriving step by step, diagnosis through recovery, at the moments they matter.
- **For the family.** A caregiver version travels alongside the patient's, so families see the same plan and carry the same expectations.
- **For the care team.** Engagement tracked at every step, so staff time goes to the patients who are drifting.
- **In your brand.** White-labeled and built from your existing content, alongside the folder and the call, never in place of them.

PLATFORM EVIDENCE, FROM THE CONTROLLED TRIAL

Patients arrived better prepared, called less, and had fewer complications

+65%

understanding of the plan of care

−53%

calls to the nursing line of care

−41%

readmissions among patients carrying an orbit

+22%

patient satisfaction

9 in 10

navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

A virtual mentor, *in orbit* *around every patient.*

An orbit surrounds the patient with the guidance, information, and support their journey asks for, at every step. It acts as a virtual mentor: it knows where the patient is, what comes next, and what they have and have not done.

DELIVERED THROUGH AN ORBIT

What surrounds the patient

A white-labeled guide in your brand and voice that opens in the patient's own browser and evolves as the journey advances.

- **Guidance at every step.** The right instruction at the right moment, sequenced to the clinical pathway from diagnosis through recovery.
- **Support when it matters.** Preparation before each milestone, warning signs to watch for, and who to call when something feels wrong.
- **It evolves with the journey.** The same orbit advances through the journey's phases on its own, with no new app or login.
- **Information they trust.** Your team's own education and content, active and engaging, not a static stack of PDFs.
- **A virtual mentor.** The orbit knows where the patient is, what comes next, and what they have and have not done.
- **Family included.** A caregiver version carries the same plan, so the household pulls in the same direction.

BEYOND THE ORBIT

Engagement that reaches out

The orbit is the destination. A layer of outbound engagement complements it and pulls each patient back at the right moments.

- **Email and text.** Scheduled outreach and reminders that arrive on the channel each patient actually answers.
- **Nudges that adapt.** Timing, channel, and frequency adjust to how each patient responds.
- **Videos and messages.** Short, timely pieces from your team that motivate the next step, not another portal notification.
- **Always back to the orbit.** Every touch leads to the guide, so the patient always lands in one trusted place.

THE PATIENT ENGAGEMENT INDEX

Every action, and every inaction, counts

- **Every action, and every inaction, is tracked.** Pages opened, videos watched, check-ins answered, reminders ignored: all of it feeds the proprietary Patient Engagement Index.
- **It shows who is on course and who is drifting.** Your team sees a score per patient, routed by role and urgency, before disengagement becomes a poor outcome.
- **It adjusts the experience automatically.** Content, channel, and cadence adapt to each patient's score, so the orbit works harder for the patients who need it most.

Every patient carries an Engagement Index Score your team can act on.

DESIGNED AGAINST YOUR PAIN POINTS

Every orbit starts from the pain points you name: readmissions, cancellations, no-shows, call volume. It is designed to move those numbers, and then measured against them, so engagement is never activity for its own sake.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your practice's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK THE JOURNEY THAT IS COSTING YOU

Readmissions, cancellations, no-shows, or call volume: bring the journey and the education your team already trusts.

- **The journey.** The pathway that is costing you: readmissions, cancellations, no-shows, or call volume.
- **Your content.** The education your team already trusts. Engage delivers your material, not generic content.
- **The destination.** Where results land: a care team dashboard, the EHR, or a program report.
- **Your brand.** White-labeled in your voice, as if you built it yourself.

STEP TWO: WE BUILD IT FROM YOUR MATERIAL

Engage carries your education, reminders, and next steps to patients and families, step by step from diagnosis through recovery. Active, engaging pages sequenced to the clinical pathway, not a static library of PDFs and webpages. We build it from your material for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about six weeks. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter. Designed against your pain points, then measured against them.

Five ways an orbit is issued

From the workflow you already run

- | | |
|---|---|
| <p>01 Ordered from the EHR. Like any other order; activation and engagement return to the dashboard.</p> | <p>02 Issued from a patient list. Bulk issue, with activation tracked per patient.</p> |
| <p>03 QR code or text message. A poster, a packet insert, or a text, in one step.</p> | <p>04 On-site registration. Enrolled in the room in under a minute, no portal account.</p> |
| <p>05 Nightly flat file. Orbits issued automatically each night, no interface project.</p> | <p>06 No new FTEs. Whichever route, nothing added to anyone's day.</p> |

Nothing added to anyone's day, *and everything visible.*

ZERO DISRUPTION

Built to slot in, not bolt on

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE CARE TEAM

You can finally see it

- Who opened their orbit and who never did, by patient, on the care team dashboard
- Patients not engaging with their care material flagged, before it becomes a poor outcome
- Engagement and completion rollups by service line and by site, exportable for your committee

COMMON QUESTIONS

What your team might ask

- **Does my staff have to write the content?** No. We develop it from your protocols and materials, and we maintain it. Your team reviews and approves.
- **What does IT have to do?** As little as a scheduled flat file, or nothing at all. HIPAA, SOC 2, and HITRUST documentation is ready for review.
- **Will patients actually use it?** It opens in the browser with no app or login, and outreach adapts to each patient. In the controlled trial, 9 in 10 navigated their journey better.
- **How fast will we know if it works?** Six weeks to launch, and the first cohort reports against your baseline inside a quarter.

The next move: 20 minutes discussing *your* engagement gaps and *our* platform.

No demo script, no obligation. We hear which moments are costing your practice the most, and give you a brief look at the platform.
