

Measurement-based care, *without the administrative weight.*

Your program in your clinicians' own words, delivered when each step actually matters. Alongside the intake packet and the follow-up call, an orbit adds a consumer-grade digital mentor: engaging video, email, and text outreach that keeps patients engaged, reassured, and connected between sessions. No app, no login, no new FTEs.

The understanding gap: the six days between sessions

None of this is decided in session. Each one turns on whether a patient understood the plan, kept taking the medication, recognized a warning sign, or came back next week.

APPOINTMENTS MISSED

Every day

MANAGED ALONE

How an orbit provides value

- 01 Fewer appointment no-shows.** The largest and most immediate revenue leak in behavioral health, and largely an engagement problem.
- 03 Better medication continuation.** Psychiatric regimens are abandoned at the first side effect unless someone explains what to expect.
- 05 Fewer avoidable crisis presentations.** A plan in the patient's pocket instead of an emergency department at midnight.
- 02 Lower early dropout.** Most patients who disengage do so in the first few sessions, before treatment has had time to work.
- 04 Fewer 30-day readmissions.** The costliest between-session failure, and the one most often preceded by an unrecognized warning sign.
- 06 Fewer inbound calls per episode.** Every repeat call is clinical time spent re-explaining what was already covered.

PLATFORM EVIDENCE, FROM THE CONTROLLED TRIAL

Patients arrived better prepared, called less, and came back less

-41%

readmissions

-53%

calls to the office

+65%

understanding of the plan and what to expect

+22%

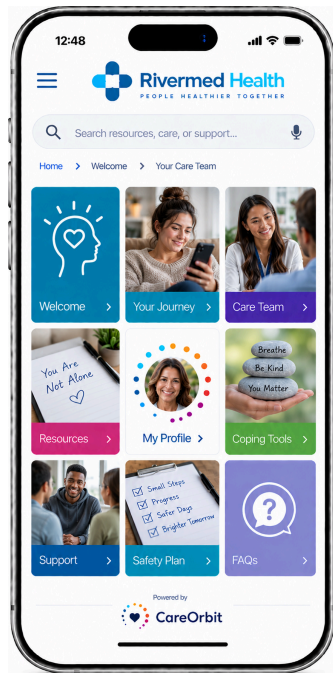

patient satisfaction

9 in 10

navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your program's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK YOUR JOURNEY

Most programs start with an intensive outpatient program or a medication start.

- **Program support.** Intensive outpatient, partial hospitalization, and group programs.
- **Medication start.** What it does, what to expect, and why it continues.
- **Discharge and step-down.** The highest-risk window after an inpatient stay.
- **Family and support.** A version for the people helping at home.

STEP TWO: SHAPE IT WITH ORBIT SOLUTIONS

Eight behavioral health journey blueprints, from program support and medication starts through discharge and step-down, slot into the journey you pick. Each is versioned to precisely match your protocols and content for your launch. We build it for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about six weeks. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PROGRAM

You can finally see it

- Who opened their orbit and who never did, by patient
- Check-in responses routed back before the next appointment
- Engagement and completion by program and by site

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes discussing *your* behavioral health pain points and *our* platform.

No demo script, no obligation. We hear which moments are costing your program the most, and give you a brief look at the platform.
