

CAPTURE

Your information, *everywhere* *it needs to be.*

Your best patient material is trapped in binders, shared drives, and one person's inbox. Capture pairs the platform with our expert conversion service: our team guides the intake, structuring what gets converted and in what order, then distributes it digitally to patients, providers, and care teams. No app, no login, no new FTEs.

Where good material is stuck today

- **Trapped in formats.** PDFs, print binders, slide decks, and video files nobody can reach from a phone.
- **Undeliverable at the moment of need.** Good material that never reaches the patient after they leave the building.
- **No single source of truth.** Three versions of the same instruction sheet, each slightly different.
- **Invisible usage.** No way to know what was opened, understood, or ignored.

From binder to delivered, in five steps

- 01 Intake.** Documents, handouts, protocols, and video, in whatever format they live in today. No rewriting up front.
- 02 Organize.** Structured, versioned, and tagged to the right journey, service line, and moment.
- 03 Distribute.** Orbits, QR codes, text, and email, reachable without a portal login.
- 04 Measure.** Views, completion, and engagement by audience and content item.
- 05 Expert guidance, end to end.** Our team maps what to convert first and how it compounds toward results.
- 06 One canonical version.** Updated once and reflected everywhere it is used.

Platform plus expert conversion service

WHAT YOU CAN FINALLY MEASURE

Reported back by audience and content item

Views

what was opened, by audience

Completion

what was finished, not just sent

Engagement

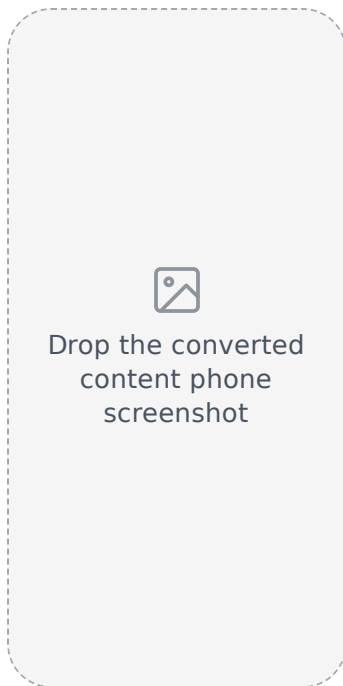

what worked, and what to retire

One version

updated once, reflected everywhere

Capture reporting: views, completion, and engagement by audience and content item.

Start with one binder. *Prove it in a quarter.*

Your material as patients see it, in your brand and clinical voice. Opens in the phone's browser, with no app download required.

STEP ONE: BRING ONE BINDER

One packet, binder, or shared drive of the material your teams use today.

- **One binder or drive.** The material your teams actually use.
- **The approver.** Who reviews that material when it changes.
- **Today's route.** Where patients get it now: folder, portal, front desk, or memory.
- **Your brand.** Your clinical voice, instead of an internet search.

STEP TWO: WE CONVERT AND ORGANIZE IT

Our team guides the intake: what to convert first, how to structure it, and how it maps to care journeys and orbits. Strategic rather than binder by binder, so the work compounds toward results instead of a pile of digitized files. One canonical version, updated once and reflected everywhere it is used.

STEP THREE: DISTRIBUTE AND MEASURE

Delivered across orbits, QR codes, text, and email, reachable without a portal login. Views, completion, and engagement reported back so you can retire what is not working and invest in what is.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PROGRAM

You can finally see it

- What was opened, understood, or ignored, by audience and content item
- One canonical version, updated once and reflected everywhere
- Fewer repeat questions answered one patient at a time

Engagement
Index Score
What is this?

91

Usable on its own or as the content layer inside every CareOrbit journey.

The next move: 20 minutes discussing *your* content bottlenecks and *our* platform.

No demo script, no obligation. We hear which moments are costing your practice the most, and give you a brief look at the platform.
