

Patients who understand their therapy, *and stay on it.*

Your counseling in your pharmacists' own words, delivered when each instruction actually matters. Alongside the printed leaflet and the counseling call, an orbit adds a consumer-grade digital mentor: engaging video, email, and text outreach that keeps patients informed, reassured, and taking the therapy as prescribed. No app, no login, no new FTEs.

The understanding gap: the prescription nobody watches

None of this is decided at the counter. Each one turns on whether a patient understood what the medication does, handled a side effect without stopping, and refilled it on time.

SPENT COUNSELING

50%

NONADHERENT ON LONG-TERM THERAPY

Week 2

WHERE MOST THERAPIES STOP

Every dose

TAKEN ALONE

How an orbit provides value

- 01 **Higher adherence on long-term therapy.** Roughly half of chronic medication is not taken as prescribed, and almost none of that is visible to the prescriber.
- 02 **Fewer avoidable admissions.** Nonadherence is one of the most consistently cited drivers of preventable hospitalization.
- 03 **Higher refill persistence.** A lapse caught at week three is recoverable. One found at the next visit usually is not.
- 04 **Fewer medication errors at home.** Timing, food rules, and interactions explained once at the counter and never again.
- 05 **Fewer inbound calls per patient.** Every repeat call is pharmacist time spent re-explaining what was already covered.
- 06 **Better performance on adherence measures.** Adherence measures carry direct weight in quality and star-rating programs.

navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your program's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK YOUR JOURNEY

Most programs start with their highest-cost or highest-abandonment therapy.

- **Specialty starts.** High-cost therapies where abandonment is most expensive.
- **Anticoagulation.** The regimen where a misunderstanding is most dangerous.
- **Injectables and GLP-1s.** Technique, titration, and side effect expectations.
- **Refill and persistence.** The long tail where most therapies quietly stop.

STEP TWO: SHAPE IT WITH ORBIT SOLUTIONS

Eight medication therapy journey blueprints, from specialty starts and anticoagulation through refill persistence, slot into the journey you pick. Each is versioned to precisely match your protocols and content for your launch. We build it for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about six weeks. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PROGRAM

You can finally see it

- Who opened their orbit and who never did, by patient
- Adherence and side effect check-ins routed back between fills
- Persistence and refill patterns by therapy and by site

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes discussing *your* medication therapy pain points and *our* platform.

No demo script, no obligation. We hear which moments are costing your program the most, and give you a brief look at the platform.
