

THE CAREORBIT PLATFORM

The patient engagement platform for *the whole clinical journey.*

CareOrbit carries your guidance from diagnosis through recovery, driving better outcomes for patients, families, and care teams. Guidance, assessment, content, and data on one platform, built around the journeys that cost systems the most. No app, no login, no new FTEs.

For Health Systems • For Service Lines • For Practices • For Employers

One platform, four components

- **Engage.** Guided digital journeys that carry your guidance from diagnosis through recovery.
- **Capture.** Your best patient material converted into one organized, trackable system.
- **Assess.** PROMs, eScreening, and check-ins collected on schedule, without the chasing.
- **Data.** Engagement, adherence, and outcomes measured from the first click, on every orbit.

Five things the platform gets right

Built for action, connection, and better outcomes

- 01 Meeting patients where they live.** Your guidance travels with the patient, on whatever device is in their pocket.
- 02 Guidance that adapts.** Content, channel, and cadence adjust to each patient's Engagement Index score.
- 03 Instant access to support.** No app, no login, no portal account. A text, an email, or a QR code opens the orbit.
- 04 Nothing added to the day.** Orbits issue from the workflow you already run: an EHR order, a list, or a flat file.
- 05 Differentiation that matters.** A visibly higher standard of care, in your brand and clinical voice.
- 06 One record, one dashboard.** Journeys, assessments, content, and results land in a single care-team view.

PLATFORM EVIDENCE, FROM THE CONTROLLED TRIAL

Patients arrived better prepared, called less, and came back less

+65%

understanding of the plan of care

-53%

calls to the nursing line

-41%

readmissions among patients carrying an orbit

+22%

patient satisfaction

9 in 10

navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center with Washington University.

A clinical journey doesn't happen in fragments. *Neither should the guidance.*

When guidance is scattered across portals, papers, and voicemails, it fails patients, drives up costs, and wastes staff time. CareOrbit brings guidance, assessment, content, and data together on one platform, from diagnosis through recovery.

The orbit as your patients see it, in your brand and voice. Opens in the phone's browser, with no app download required.

WHICH COMPONENT FITS YOUR PROBLEM

Each component stands on its own, and they compound when combined. Start where the cost is.

- **Engage.** A costly journey is the problem: readmissions, cancellations, no-shows, or avoidable call volume.
- **Assess.** A screening mandate, a PROMs requirement, or a billable service going undocumented.
- **Capture.** Nobody can say which version of a handout, protocol, or video is the current one.
- **Data.** A committee that wants numbers: engagement, adherence, and outcomes you can defend.

ONE RECORD, ONE DASHBOARD

Journeys, assessments, content, and results land in a single record and one dashboard for the care team, rolled up from the individual patient to the program. Committee-ready views export in one click.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

GUIDANCE THAT ADAPTS

Every action, and every inaction, counts

- Every action, and every inaction, feeds the Patient Engagement Index
- The platform works hardest for the patients who are drifting, adjusting content, channel, and cadence
- Your team sees who is on course and who needs a call, before the next visit does

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes mapping *your* goals against *our* platform.

No demo script, no obligation. We map your improvement goals against a proven blueprint and show you exactly which component, or combination, would target them.
