

The most dangerous risk on the jobsite is *the one nobody reports.*

High-risk industries have spent decades engineering physical safety. Behavioral risk has not had the same infrastructure. CareOrbit delivers a private, mobile orbit to every worker: what to watch for, where to get help, and a way to reach it without going through a supervisor. Reach is reported back de-identified. No download, no login, no new FTEs.

What behavioral risk costs an employer today

- **Workers' compensation.** Injuries linked to mental health cost 2.3 times more and last twice as long. (NCCI)
- **Insurance premiums.** Behavioral-health-related claims raise premiums an estimated 10–15%. (Actuarial benchmarks)
- **Lost days of work.** Depression and distress drive roughly five missed workdays per worker each year. (NIOSH)
- **Turnover and retention.** Replacing a skilled tradesperson costs 20–40% of annual wages. (CII)

Where the value shows up

- 01 **Claims avoided.** Support that reaches a worker early keeps a struggle from becoming an incident, an injury, and a claim.
- 02 **Days kept on the job.** Workers connected to help miss fewer days and come back sooner.
- 03 **Skilled trades retained.** A visible investment in workers, aimed at the people hardest to replace.
- 04 **Fewer job-site errors.** Stress and fatigue contribute to an estimated 70% of job-site mistakes; awareness reaches them first. (CPWR)
- 05 **Crisis readiness.** Every worker knows where help is before the day they need it.
- 06 **Numbers for leadership.** De-identified reach reporting for safety committees, insurers, and boards.

THE NUMBERS BEHIND THE RISK

Construction as the benchmark; the pattern holds across high-risk trades

4×

the national suicide rate: 53.2 per 100,000 construction workers vs 17.3 overall

56

per 100,000 male construction workers in 2021, second only to mining

162.6

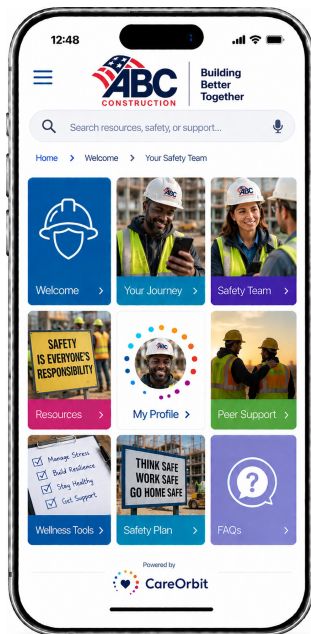

overdose deaths per 100,000 in construction and extraction, the highest of any occupation

5×

more workers lost to suicide than to all fatal work injuries combined

Pick one journey. *Prove it in a quarter.*

The worker orbit home screen, in your organization's brand and voice. Opens in the phone's browser, with no download and no login.

STEP ONE: PICK THE FIRST SITE OR CHAPTER

A pilot on one site or chapter is enough to prove reach before it scales.

- **Worker Support Orbit.** Private, on their own phone.
- **Peer Support Orbit.** How to see it and how to help.
- **Trade and state versions.** By trade, geography, and chapter.
- **Branded partner versions.** A single company, union, or organization.

STEP TWO: WE BUILD AND YOU APPROVE

Two core orbits, a private Worker Support Orbit and a Peer Support Orbit for supervisors, peers, and family, versioned by trade, state, and chapter. We build from your existing safety materials; nothing goes live until your lead signs off.

STEP THREE: MEASURE REACH, THEN SCALE

First crew inside a quarter, with launch and training materials provided. De-identified reach reporting decides what turns on next.

ZERO DISRUPTION

Nothing added to anyone's day

- **Introduce.** Handed out by safety leadership, in person, on site.
- **Activate.** The worker enters an email address and nothing else.
- **Connect.** One tap to the crisis line, warm line, EAP, or community resource.
- **Reach.** A QR code on a poker chip, decal, or signage.
- **Educate.** Short, direct modules on the risks that take workers out.
- **Measure.** Activations, topics, and click-throughs reported de-identified.

FOR SAFETY LEADERSHIP

Reach, reported de-identified

- Activations by site, crew, and time period
- Topics viewed and resource click-throughs, in aggregate
- Never individual activity: nobody sees who activated or what they read

Engagement
Index Score
What is this?

91

Aggregate reach reported for safety and HR review. Never individual activity.

The next move: 20 minutes discussing *your* workforce's behavioral risk and *our* platform.

No demo script, no obligation. We hear which moments are costing your workforce the most, and give you a brief look at the platform.
