

Fewer readmissions, well-prepared patients, and *a quieter phone line.*

The journey spans surgery, infusion, and radiation, and it is between visits that preparation, side-effect management, and warning signs decide outcomes. An orbit carries your presence and protocol into those weeks and reports back on how each patient is keeping up. Proven in a controlled trial at Siteman Cancer Center. No app, no login, no new FTEs.

The understanding gap: the key moments in between their visits

None of this is decided in the infusion suite. Each one turns on whether a patient understood the regimen, recognized a side effect early, or had the family member with them who manages the medications.

Weeks

BETWEEN APPOINTMENTS

How an orbit provides value

- 01 **Fewer 30-day readmissions.** Reduced 41% in the controlled trial.
- 02 **Fewer avoidable ED visits.** Side effects managed at home, not on a weekend.
- 03 **Fewer inbound calls per episode.** The trial returned 53% of nursing and navigator time.
- 04 **Protected treatment throughput.** Surgical slots, infusion chairs, and linac hours kept full.
- 05 **PROMs collected on schedule.** For accreditation, quality, and value-based contracts.
- 06 **Retention through survivorship.** Surveillance kept, and the next referral earned.

navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your program's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK YOUR JOURNEY

Your highest-volume regimen or surgical pathway, or the disease site where readmissions cost the most.

- **Treatment support.** Chemo, immunotherapy, and radiation, by regimen.
- **Surgical support.** Cancer operations, prep through recovery.
- **Survivorship.** Late effects and surveillance schedules.
- **Screening and outreach.** Before someone is a patient.

STEP TWO: SHAPE IT WITH ORBIT SOLUTIONS

An Oncology Department Bundle gives you up to 20 main orbit versions for patients and families, from colectomy and the Whipple to chemotherapy, radiation, and survivorship. Each is versioned to precisely match your protocols and content for your launch. We build it for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about six weeks. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PROGRAM

You can finally see it

- Who opened their orbit and who never did, by patient
- Patients not engaging with their care material flagged, before it becomes a poor outcome
- Engagement and completion by disease site and by clinic

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes discussing *your* oncology pain points and *our* platform.

No demo script, no obligation. We hear which moments are costing your service line the most, and give you a brief look at the platform.
