

Your best guidance and motivation in the patient's hands, *every day between visits.*

Guided digital support tailored to each procedure and each surgeon's protocol, carried through prehab, surgery, and the full recovery window, so every patient arrives ready and recovers as expected. An orbit carries your presence into those weeks and reports back on how each patient is keeping up. No app, no login, no new FTEs.

The understanding gap: four visits inside a 120-day journey

None of these days are billable, and none of them are staffed. A cancelled case, an unfinished home program, a brace worn wrong, or a call that becomes an ED visit all happen in the stretch between appointments.

4	120 days	2 weeks	116
VISITS WITH YOU	LENGTH OF THE EPISODE	BETWEEN EACH VISIT	DAYS ON THEIR OWN

How an orbit provides value

- 01 Fewer cancellations and delays.** A cancelled case is operating room time you cannot get back. Prepared patients keep the schedule intact.
- 02 Higher therapy protocol adherence.** What separates a good surgical result from a good functional one.
- 03 Fewer avoidable readmissions and ED visits.** The most expensive way to answer a question a patient could have had answered at home.
- 04 Fewer inbound calls per episode.** Staff time spent re-explaining what was already covered.
- 05 Higher PROM completion rates.** Bundled and value-based programs pay on documented outcomes. Missing scores are unbilled work.
- 06 Correct equipment use at home.** Brace and weight-bearing errors cause the revisions and delays that erase an episode's margin.

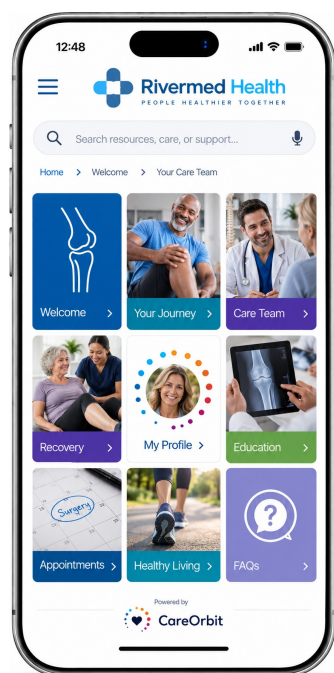

PLATFORM EVIDENCE, FROM THE CONTROLLED TRIAL

Patients arrived better prepared, called less, and came back less

-41%	-53%	+65%	+22%	9 in 10
readmissions	calls to the office	understanding of the plan and what to expect	patient satisfaction	navigated their journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your practice's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK YOUR JOURNEY

Most practices start with their highest-volume procedure. All four run as one guide the patient keeps.

- **Procedure support.** Joint replacement, ACL, rotator cuff, spine, arthroscopy.
- **Therapy adherence.** The home program, week by week, with PROMs on schedule.
- **Nonoperative care.** Injections and conservative management before surgery is on the table.
- **Activity and outreach.** Seminars, screenings, and sports or senior activity plans.

STEP TWO: SHAPE IT WITH ORBIT SOLUTIONS

An Orthopedics Department Bundle gives you 18 procedure orbit versions for patients and families, plus injection, sports, and activity orbits and a template for everything else. Each is versioned to precisely match your protocols and content for your launch. We build it for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about six weeks. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PRACTICE

You can finally see it

- Who opened their orbit and who never did, by patient
- Adherence and symptom check-ins routed back before the next visit
- PROM completion by procedure, surgeon, and site

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes discussing *your* orthopedic pain points and *our* platform.

No demo script, no obligation. We hear which moments are costing your practice the most, and give you a brief look at the platform.
