

Confident, prepared patients, *at every stage of her care.*

Your protocol in your clinicians' own words, delivered when each instruction actually matters. Alongside the visit summary and the on-call line, an orbit adds a consumer-grade digital mentor: engaging video, email, and text outreach that keeps patients informed, reassured, and on track between appointments. No app, no login, no new FTEs.

The understanding gap: the stretch you do not see is most of her life

None of this is decided in the exam room. Each one turns on whether a patient understood the plan, kept the visit, and recognized the sign that mattered.

How an orbit provides value

- Fewer avoidable readmissions and ED visits.** The costliest after-discharge failure, and the one that most often follows a sign nobody recognized.
- Higher follow-up visit attendance.** The visit where the real clinical decisions get made, and the one most often skipped.
- Fewer cancelled and rescheduled cases.** A case that falls off the schedule late is revenue that rarely gets refilled.
- Earlier recognition of warning signs.** A patient who calls about a symptom costs a phone call, not an admission.
- Better screening completion.** Mammography, cervical, and bone density screening tracked instead of assumed.
- Fewer inbound calls per episode.** Every repeat call is nursing time spent re-explaining what was already covered.

PLATFORM EVIDENCE, FROM THE CONTROLLED TRIAL

Patients arrived better prepared, called less, and came back less

-41%

readmissions

-53%

calls to the office

+65%

understanding of the
plan and what to expect

+22%

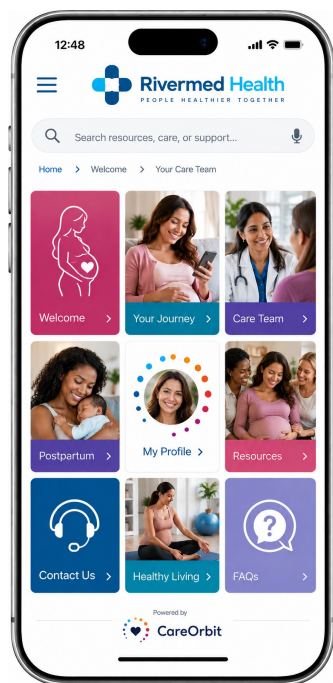

patient satisfaction

navigated their
journey better

CareOrbit controlled clinical trial, Siteman Cancer Center.

Pick one journey. *Prove it in a quarter.*

The orbit home screen as your patients see it, in your practice's brand and voice. Opens in the phone's browser, with no app download required.

STEP ONE: PICK YOUR JOURNEY

Most practices start with their highest-volume journey and add the rest. All four run as one guide the patient keeps.

- **Well woman care.** The default orbit a patient keeps between annual visits.
- **Maternity and fertility.** Pregnancy week by week, delivery prep, and the fourth trimester.
- **Procedure support.** Hysterectomy, myomectomy, and the operative long tail on one template.
- **Menopause and midlife.** Symptoms, therapy options, and long-term risk, explained plainly.

STEP TWO: SHAPE IT WITH ORBIT SOLUTIONS

A Women's Health Department Bundle gives you 15 orbit versions across the whole relationship: a default Well Woman orbit that procedure orbits return to, plus maternity, operative, and midlife journeys. Each is versioned to precisely match your protocols and content for your launch. We build it for your team's review.

STEP THREE: WE MEASURE AGAINST YOUR BASELINE

Live in about six weeks. We deliver engagement, completion, and the operational numbers you named, against your baseline, inside a quarter.

ZERO DISRUPTION

Nothing added to anyone's day

- **No new FTEs.** Nothing added to anyone's day.
- **Live in a quarter.** From kickoff to first patient.
- **No risk, no lock-in.** And no disruption to your offices.
- **White-label.** Your brand, your voice.
- **HIPAA, SOC 2, HITRUST.** Documentation ready for review.
- **EHR-friendly.** A scheduled flat file, or nothing at all.

FOR THE PRACTICE

You can finally see it

- Who opened their orbit and who never did, by patient
- Symptom and screening responses routed back before the next visit
- Engagement and completion by service and by site

Engagement
Index Score
What is this?

91

Every patient carries an Engagement Index Score your team can act on.

The next move: 20 minutes discussing *your* women's health pain points and *our* platform.

No demo script, no obligation. We hear which moments are costing your practice the most, and give you a brief look at the platform.
